

RAJWANT RAJ

Aspiring AI/ML & Software Development Intern

Dehradun, India | rajwantraj667@gmail.com | [linkedin.com/in/rajwant-raj](https://www.linkedin.com/in/rajwant-raj) | github.com/rajwant-raj

PROFESSIONAL SUMMARY

B.Tech Computer Science & Engineering student (CGPA: 8.80) with hands-on experience building AI/ML and Python-based applications across two internships. Skilled in Python, Machine Learning, Deep Learning, and Data Visualization, with a track record of shipping deployed applications including a stock-prediction dashboard with engineered time-series features and a CNN-based digit classifier achieving ~98.6% accuracy. Currently serving as GeeksforGeeks Campus Mantri, leading coding-culture initiatives on campus. Seeking an internship in Software Development, AI/ML, or Data Science.

TECHNICAL SKILLS

Programming Languages: Python, Java, C

Web Fundamentals: HTML, CSS, JavaScript

AI/ML: Machine Learning, Deep Learning, Convolutional Neural Networks (CNN), Scikit-learn, TensorFlow/Keras, Random Forest, Logistic Regression, Decision Trees, Model Evaluation (Accuracy, Precision, Recall, Confusion Matrix, ROC-AUC), Feature Engineering, Generative AI, Prompt Engineering

Data Science & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Exploratory Data Analysis, Data Cleaning & Preprocessing

Frameworks & Tools: Streamlit, Jupyter Notebook, Google Colab, Joblib, yfinance API

Version Control: Git, GitHub

Soft Skills: Problem Solving, Team Collaboration, Leadership, Quick Learning, Logical Thinking, Community Building

EXPERIENCE

GeeksforGeeks Campus Mantri (Part-time) — GeeksforGeeks

Jun 2026 – Present

Uttaranchal University, Dehradun · On-site

- Serve as the official GfG Campus Mantri, promoting coding culture and GfG initiatives across campus.
- Connect students with technical events, learning resources, and career opportunities, driving peer engagement and community growth.

Artificial Intelligence Intern — Codec Technologies India

Jun 2026 – Jul 2026

Remote

- Built FinSight AI, a financial analytics dashboard that engineers 17 time-series features and trains a Random Forest Regressor to predict next-day stock closing prices using a leakage-safe, chronological train/test split.
- Developed AssistIQ, a rule-based customer service chatbot using Python and Streamlit to automate handling of common support queries.
- Applied data preprocessing, model evaluation, and prompt-engineering concepts to ship 2 deployable AI applications, strengthening GitHub documentation and AI application development skills.

AI/ML Intern — Scalexix

Jun 2025 – Aug 2025

Ahmedabad, India · Remote

- Built and trained a CNN-based handwritten digit recognizer (MNIST, ~98.6% accuracy) with a live Streamlit drawing canvas; also built a rule-based medical chatbot prototype.
- Performed data preprocessing, feature scaling, model tuning, and evaluation using NumPy, Pandas, and Scikit-learn.

PROJECTS

FinSight AI — Financial Market Analytics & Stock Prediction Dashboard

Python, Streamlit, Scikit-learn, Plotly, yfinance | GitHub: github.com/rajwant-raj/FinSight_AI

- Engineered 17 predictive features (lag prices, rolling statistics, cyclical calendar encoding) from raw OHLCV data and trained a Random Forest Regressor (200 estimators) to forecast next-day closing prices.
- Built a chronological, non-shuffled train/test split to prevent look-ahead bias; evaluated results using MAE, RMSE, and R² score.
- Implemented a technical indicator engine (SMA, EMA, RSI, Volatility) and automated insight generator for trend, risk, and bullish/bearish signals across 10 stocks (US & NSE).

HeartGuard AI — Heart Disease Risk Predictor

Python, Scikit-learn, Streamlit, Pandas, Seaborn | GitHub: github.com/rajwant-raj/HeartGuard-AI

- Trained and benchmarked Logistic Regression, Decision Tree, and Random Forest classifiers on the UCI Heart Disease dataset, selecting Random Forest for production based on comparative accuracy.
- Evaluated model performance using confusion matrix and ROC-AUC analysis; built a real-time, dark-themed Streamlit interface for cardiovascular risk prediction from clinical parameters.

Handwritten Digit Recognizer — CNN with Interactive Drawing Canvas

Python, TensorFlow/Keras, Streamlit | GitHub: github.com/rajwant-raj/handwritten-digit-recognition-canvas-version

- Designed a CNN (2 Conv2D + 2 MaxPooling + Dense layers) trained on MNIST, achieving ~98.6% test accuracy for digit classification.
- Built an interactive canvas UI enabling users to hand-draw digits for instant prediction with a live confidence-score visualization.

EDUCATION

Bachelor of Technology, Computer Science & Engineering — Uttaranchal University, Dehradun *Expected 2028*

CGPA: 8.80 (through 4th Semester)

CERTIFICATIONS

- TCS iON Career Edge – Generative AI Essentials, Tata Consultancy Services (2026)
- Fundamentals of Machine Learning and Artificial Intelligence, AWS Training & Certification (2026)
